

LABORATORY RECORD

Course: Full Stack Web Development

Course Code: 23CM4121

Experiment No.: 1

Student Name: A.Rohit

Roll No.: A24126552067

Date: 08-09-2026

1. TITLE

HTML Layout and Basic Elements

2. AIM

To understand and implement basic HTML document structure, tags, image embedding, and layouts.

3. OBJECTIVE

The objectives of this experiment are:

- Understand semantic HTML tags.
 - Create basic page layouts using divs and spans.
 - Embed and display images correctly on a webpage.
-

4. THEORY

HTML provides the fundamental structure for web pages. Utilizing tags like div, span, img, and basic text formatting tags allows us to construct the skeleton of any website.

5. ALGORITHM / PROCEDURE

1. Create index.html.
 2. Add standard boilerplate HTML.
 3. Construct layout using semantic tags.
 4. Add images and text elements.
 5. Load in browser and verify layout.
-

6. PROGRAM

Source File: index.html

```

<!DOCTYPE html>
<html lang="en">
<!-- head is for the head of the html-->
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>FIRST WEB IN FS CLASS</title>
</head>
<!-- and we give body to the website or doc -->
<body>
  <div style="background-color: azure;">
    <header>
      <table border="1">
        <tr>
          <td>
            <nav>
              <a href="https://anits.org/" target="_blank"> <br> anits web </a>
            </nav>
          </td>
        </tr>
      </table>
    </header>
    <h1>
      <!-- THE STRONG WE USED CAUSE ITSTHE MAIN HEADING AND WE WANT IN BOLD-->
      <strong>ideas to think </strong>
    </h1>
    <!-- here we gave heading with h and with p is the paragraph -->
    <p>
      here the sections we can think the <MARK>IDEA</MARK> through the every details we
      obv<INS>OBV</INS> in real world<br><!-- br is for new line -->
      here is we can search and think about <SMALL>UI</SMALL> <del>ALSO</del>
    </p>

    <hr>
    <!-- so for the net features not to show like lots in a doc we are giving the horizontal line -->
  </div>
  <div style="background-color: rgb(206, 241, 230);">
    <h2>
      <!-- THE B WE USED CAUSE ITSTHE 2ND MAIN HEADING AND WE WANT IN BOLD-->
      <b>features to think </b>
    </h2>
    <p>
      <I> here we can think the<U>FEATURES</U> to the idea we got in this section </I>
    </p>
    <!-- same here we are giving the horizontal line -->
    <hr>
  </div>
  <div style="background-color: aliceblue;">

    <h1>
      THE WEBS TO REFER
    </h1>
    <p>
      THE WEBS ARE TO REFER LIKE AMAZON FOR MARKETING

```

```

<a href="https://www.amazon.in/ref=nav_logo" target="_blank">
<br> <strong>AMAZON</strong>
</a>
<br>
and also like insta website ui is like
<br>

<br>
<br>
<br>
<hr>
and still there are many ui to efer like
<ol>
  <li>
    <b>AMAZON</b>
  </li>
  <li>
    <b>facebook</b>
  </li>
  <li>
    <b> ninefall hub</b>
  </li>
  <li>
    <b>epic games</b>
  </li>
</ol>
</P>
<hr>
</div>
<div style="background-color: antiquewhite;">
<h2>
  table wise explanation for web and fields
  <!-- table creating for the names of app and what is that for-->
</h2>
</div>
<div style="background-color: peachpuff;">
<p><table border="2">
  <tr>
    <th>app/webiste</th>
    <th>field</th>
  </tr>
  <tr>
    <td>
      <ol>
        <li>facebook</li>
        <li>amzon</li>
      </ol>
    </td>
    <td>
      <ol>

```

```
        <li>social media</li>
        <li>market place</li></ol>

    </td>

</tr>
</table>
</p>
</div>
</body>
</html>
```

7. TEST CASES AND EXECUTION DATA

The experiment was executed with the following test cases to verify functionality:

Test Case	Action	Expected Result	Status
TC-1	Open page in browser	Layout loads and images are visible	Pass

8. OUTPUT

Output 1

See everyday moments from your
close friends.

Output 2

[anits.web](#)

ideas to think

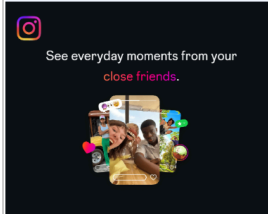

here the sections we can think the **IDEA** through the every deatils we obv**OBV** iun real world
here is we can search and think about UI **ALSO**

features to think

here we can think the**FEATURES** to the idea we got in this section

THE WEBS TO REFER

THE WEBS ARE TO REFER LIKE AMAZON FOR MARKETING
AMAZON
and also like insta website ui is like

9. RESULT

Thus, the HTML layout and basic elements practice was successfully completed.
